**RELIANCE’S MANAGING PARTNER FEATURED IN INTERPV**

Reliance Partners’s managing partner, Mr. Don Christensen, has been featured in the October edition of InterPV magazine. InterPV is a premier monthly business journal that specializes in solar PV energy and is one of the few solar magazines that have a global readership. InterPV is distributed in 80 countries and at major PV shows such as InterSolar (Germany/North America), ISIS, PV America/Japan, RENEXPO, and the European Photovoltaic Solar Energy Exhibition.

Mr. Christensen drafted an editorial for InterPV’s October edition on Policy & Legislation. His article discusses government policies and initiatives in India that support and promote the PV industry in that country. India’s government recently announced its solar initiative, called the ‘National Solar Mission’, that envisions the country generating 20 gigawatts of energy from sunlight by 2020.
